

*A2  
Conc.*

13. (Amended) The control method [of channel assign] according to claim 12[;], wherein said channel [assign] assignment is [done] performed when a second channel cannot be assigned newly to a modem processing means of said RF base station, to which said first channel is assigned, so that channel [assign] assignment to a plurality of said modem processing means of said RF base station is changed, thereby assigning said first and second channels to the same modem processing means.

IN THE ABSTRACT:

Line 1, after "of" insert --assigning a--;  
line 1, delete "assign";  
line 3, delete "of" and insert --having--;  
line 6, delete "thereby" and insert --and--;  
line 9, delete "in" and insert --at--;  
line 10, delete "to another".

REMARKS

The specification has been amended to correct errors of a typographical and grammatical nature. Due to the number of corrections thereto, applicants submit herewith a Substitute Specification, along with a marked-up copy of the original specification for the Examiner's convenience. The substitute specification includes the changes as shown in the marked-up copy and includes no new matter. Therefore, entry of the Substitute Specification is respectfully requested.

The claims and abstract have also been amended to more clearly describe the features of the present invention.

Entry of the preliminary amendments and examination of the application is respectfully requested.
